## INSTALLATION INSTRUCTIONS

## CARE & MAINTENANCE, WARRANTY

### ✓ PRIOR TO INSTALLATION CHECKLIST

#### 1 Check Products For Any Damages

Within 48 hours of receiving your goods, unpack your ADP product and check for any possible freight damages or incorrect items. Please contact your place of purchase to report damages or missing parts.

**No claims for damages will be recognised after installation.**

#### 2 Positioning & Ventilation

Furniture must be at least 300mm away from any wet areas. Materials used in the construction of our furniture units are moisture resistant, not water proof. Do not expose furniture to shower spray. It is important that your bathroom is adequately ventilated to eliminate moisture build up. High humidity will lead to permanent dampness and mould resulting in a deterioration of the materials in your bathroom. **Water damage is not covered under ADP Warranty.**

#### 3 Check for Support Beams

Wall hung furniture require fixing to a support beam fitted between the studs to give a solid wall backing to attach the cabinet to.

#### 4 Check for Plumb Walls

Ensure the wall is plumb and straight. If you fix the product to a non-plumb wall, the doors will not operate correctly and they will not align.

## ENZO CABINET INSTALLATION

### 1. POSITION CABINET & LEVEL

1. Place cabinet on flat surface to remove door. Remove door and place flat on soft surface with mirror facing up to avoid damages.
2. Locate support beams and using a spirit level mark position of wall support brackets in desired location.

**Note:** Damage during installation is not covered under ADP warranty.

### 3. HANG CABINET ON BRACKETS

Hang cabinet onto wall fixing brackets.

### 5. SEALING

Apply non-acidic silicone to all edges where cabinet meets the wall.

**Note:** Gap sealant can be used in place of silicone where the unit meets tiled surfaces.

### 2. SECURE THE FIXINGS

Securely fasten brackets to the wall in the marked positions with appropriate screws/bolts, ensuring they are perfectly level.

### 4. FASTEN & ADJUST DOOR

Fasten cabinet to wall with screw through back panel for safety against unhooking. Install door back onto cabinet and make adjustments to align the door correctly.

**IT IS THE RESPONSIBILITY OF THE INSTALLER TO MAKE ANY ADJUSTMENTS TO DOORS AFTER INSTALLATION.**

## DOOR HINGE ALIGNMENT & INSTALLATION

### SIDE ADJUSTMENT

Use front screw to move door to the left or right, or to level each door.

### DEPTH ADJUSTMENT

Use back screw to move door inward or outward from carcass.

### REMOVING & INSTALLING DOORS

#### TO REMOVE DOORS:

Apply finger pressure to clip at back of hinge and pull forward to release.

#### TO INSTALL DOORS:

Align door hinge with hinge mount on carcass, press back of hinge into place and listen for a 'click' to lock the hinge in place. You may need to apply a little force to lock the hinge in place.

### REMOVING & REPLACING HINGE FROM DOOR

Once you have removed door from the cabinet, using a screw driver, turn front screw to release hinge from plate.

To replace hinge, position in place and turn screw to lock in place.

## CARE & MAINTENANCE

### CABINETS

- To maintain the finish on your cabinet use only a soft cloth and weak solution of non abrasive detergent.
- All cabinets should be installed at least 300mm away from showers or bathtubs to avoid water damage.

### MIRRORS

**FOR BEST RESULTS** - use a slightly moistened microfibre cloth to remove dry dirt or grime, then buff clean with dry microfibre cloth or use a soft dry cloth with a tight weave (which is more soft and non-abrasive). This will leave you with a clean, smear-free finish. By using alkaline (ammonia) or acid (vinegar) based products you not only risk damaging the silvered backing of the mirror, but also tend to leave behind streaks and smears.

**DO NOT** use ammonia-based cleaning products such as glass cleaner. These may erode the mirror's silver backing. Be sure to read the label of any such cleaning products before use.

**PROTECTION AGAINST 'BLACK-SPOTTING'** - Alkaline, acid and moisture elements can cause the silvered backing of a mirror to darken, this is usually referred to as 'black-spotting'. An easy way to protect your mirror against black-spotting is to regularly oil any exposed edges (i.e. polished or bevelled edges), using non-petroleum based oils (eg. sewing machine oil). This will act as a seal to protect against such elements. Always remember to keep your mirror dry and wipe off any water, moisture or steam.
