

Cleaning & Care Instructions

TAPWARE & ACCESSORIES

For the best results when caring for your PARISI products, follow the instructions carefully and use only the cleaning products suggested below. The use of other cleaning products may damage or discolor your product and potentially affect the functionality.

Always test the cleaning solution on an inconspicuous area before applying to the entire surface. Wipe surfaces clean and rinse completely with water immediately after applying cleaner.

For full warranty information, visit www.parisi.com.au.

Regular dusting and cleaning will keep the product's luster. To maintain its shiny and dynamic appearance, rinse with warm water and dry with a soft cotton flannelette cloth (not a microfibre cloth). Never use any abrasive products, acidic detergent or harsh cleaners.

In case of thick sediments, clean the surface of your tapware with water and a soft cotton cloth and use mild liquid detergent, non-acidic, non-abrasive gentle liquid, or a non-abrasive liquid polisher. For a deeper clean, try applying a baking soda paste, fresh lemon or a one part vinegar, one part water mixture. To avoid damage, make sure to avoid scratchy scrubbing pads or abrasive cleaners. After it is clean, rinse the tapware again with water to thoroughly remove the cleaner and dry it with a soft cotton cloth.

Ensure splatter caused by toothpaste and other bathroom products is cleaned off promptly to avoid these substances damaging the chrome or coloured finish if left for extended periods.

PARISI Tapware and Accessories are available in an assortment of colours and finishes. These include gloss, matte and brushed PVD finishes. Matte and PVD finishes are particularly sensitive and require a gentle cleaning method.

Never use abrasive, alcohol-based, acid or solvent-based cleaners. These cleaners can damage the finish. Although vinegar does contain acid, you can dilute it for use on stubborn mineral deposits. Use a damp rag, soaked cotton wool or a toothbrush to clean the deposits. Rinse and dry off with a soft cloth to avoid water stains.

What is PVD?

PARISI PVD (Physical Vapour Deposition) is a premium, high performance finish. Consistent, uniform finishes with long lasting durability. A protective barrier is created making it highly resistant to abrasion and corrosion. Sustainable, environmentally harmonious, non-toxic manufacturing processes. Enhance your bathroom aesthetics with co-ordinated luxurious PARISI colour solutions.

ATTENTION:

It is the responsibility of the purchaser to ensure the product is installed and maintained appropriately according to manufacturer's recommendations. Failure to do so may void product warranty.
