

PARISI

Blade Sensor Function Pneumatic Flush Panel Black Glass

Product Code: PA270

The Blade Sensor Function Pneumatic Flush Panel brings the touchless flushing experience to the PARISI toilet range. The panel will automatically detect the user and illuminate. When the user wishes to flush the toilet, a simple wave of hand in front of the full or partial flush icon activates the toilet flushing system. For forgetful users, the system will automatically flush if the user exits the bathroom without activating the panel.
